

For tinkerers, collectors, enthusiasts or inventors detailed and proven technical information is very valuable research material. This technical info can be found in patent literature, meaning published patents from your field of work. This high-quality technical literature stems right from the source - the inventor himself. He describes his invention exactly down to the tiniest detail, often with construction plans and helpful exploded-view drawings. Here you can buy a collection of selected patents for your selected topic. Included in these collections are inventions that have been discovered later or that never went into production because they either were too expensive and difficult to manufacture or just no interested manufacturer was found. You will receive detailed descriptions and blueprints of constructions, individual parts, component groups, manufacturing processes, raw materials, tools and much more. What can you do with this literature? These patent publications show you the detailed functions and features of whole assemblies and component groups and often prove to be a valuable resource for repairs or restorations and often spark new inventions of your own. They are an invaluable help to replicate parts or whole products too. With this e-book you will receive extremely high-quality technical literature which will help you in many aspects of your job. Additionally it is of course very interesting to browse the records of inventors and see their work and thought processes firsthand.

Corpus Christi Plays at York: A Context for Religious Drama (Ams Studies in the Middle Ages), The 1980s (Decades of the 20th and 21st Centuries), Attaining Personal Greatness: One Book for Life, stephanie curry the ruler is glory: and i just love the lord, La Vida Es un Sueno / Life is a Dream (Clasicos Edebe / Edebe Classics) (Spanish Edition), Maurice Maeterlinck; a Critical Study, Modelling Early Christianity: Social-Scientific Studies of the New Testament in its Context, The Rat Race Millionaire Pocket Handbook: Basic financial knowledge essential to thrive in todays complex financial landscape, Deaths in Venice: The Cases of Gustav von Aschenbach (Leonard Hastings Schoff Lectures),
