

The soul of man is described by the physics of the Dot-wave theory. there is an image of us in dark energy that continues to exist after we are dead. the universe oscillates from infinity to the big bang and then radiates away. Thus universe is the physical body of God. Three possibilities are explored. A single light speed universe with an evolved God, a multi-light-speed universe with an evolved God, and a multi-light-speed universe with an Eternal god. The universes are looked at from the philosophical implications of the Dot-wave theory. The Bible and gospels are explained in terms of the dot-wave theory and the oscillating universe in which God goes from a state of potential existence and into the active existence leading up to the big bang and the creation of millions of Earths. The New Earth salvation of Isaiah is explained along with the spiritual salvation of the Kingdom of Heaven and the existence of the outer darkness for the unsaved.
